

# SPORTS WALL

HIGH-PERFORMANCE TRAINING  
WALLS FOR EVERY SPORT

**A Robust, Durable and Sustainable Training Solution.**

Excellence in Precast Concrete Engineering & Delivery.

## Precast Solutions for Sports Walls

Athletes and clubs across Ireland and the UK are enhancing their training facilities with Shay Murtagh's precast concrete Sports Walls. Built to the same high standards as our other precast concrete products, these walls deliver outstanding durability, performance and accuracy for skill development in a wide range of sports.

### About Our Sports Walls

#### Built for Performance and Longevity

Each wall is cast from reinforced, low-carbon concrete, combining environmental responsibility with top-tier strength. Engineered as solid panel units, our Sports Walls resist wear, weather, and impact.

#### Precision Training, All Year Round

With a smooth, professional-grade finish, the walls offer consistent rebound, helping athletes at every level improve their striking, kicking, and passing accuracy.

#### Custom-Tailored to Sport and Space

Whether it's hurling, camogie, football, handball, or tennis, each wall can be customised in size and surface design—including target painting—to match the needs of your club or facility.

#### Fast Installation, Long-Term Value

Our standard solution uses a sports wall panel with an in-situ foundation, allowing quick, flexible installation. Where needed, we can explore precast monolithic units with options for disassembly and reuse to support circular economy goals.

### Looking for more?

We also supply a full range of complementary precast components, including:

Architectural and structural cladding panels

Stadia Terraces and Frames

Dugouts

#### Have something special in mind?

Our team is ready to explore custom solutions with you.
